INTEROFFICE MEMORANDUM

Date : 15th March, 2021

To:	Nadia Rasheed, Deputy Resident Representative
Through:	Momin Jaan, Monitoring and Evaluation Analyst
Through:	Pankaj Mehta, Head- Resource & Planning Unit
From:	Jaimon Uthup, Policy Specialist, Policy Unit
Name of the project:	Rapid Financing Facility (RFF) : Green Recovery Pathway for India: transitioning towards a green and resilient COVID-19 recovery (00125347)
Implementing Partner :	UNDP

Annual Work Plan 2021-2022 for USD 600000 of Rapid Financing Facility (RFF) : Green Recovery Pathway for India: transitioning towards a green and resilient COVID-19 recovery (00125347) project is submitted herewith for your kind approval please.

DocuSign Envelope ID: 5C0D9AF9-D072-4389-AFF7-2B572E436E1A

United Nations Development Programme

Country: India

Initiation Plan

Project Title: Green Recovery Pathway for India: transitioning towards a green and resilient COVID-19 recovery

Expected UNDAF/CP Outcome(s): UNSDF Outcome 6: By 2022, environmental and natural resource management is strengthened and communities have increased access to clean energy and more resilient to climate change and disaster risks

Expected CPD Output(s): CPD Output 3.1: Effective institutional, legislative and policy frameworks in place to enhance the implementation of climate change and disaster risk reduction at national and subnational levels.

Initiation Plan Start/End Dates: January 2021 to June 2022

Implementing Partner: UNDP

Brief Description

UNDP in India is committed to support the efforts of the Government of India towards working with partners and key stakeholders to advocate for an environmentally sensitive response to COVID-19 that resets towards greener pathways for recovery. Our focus is to not only move towards a more sustainable, inclusive and resilient recovery, but also help to strengthen recovery by focusing on emerging and innovative green job opportunities. The COVID 19 global pandemic could potentially threaten to deepen inequalities and undo progress on the SDGs. We are already witnessing the detrimental impact of the pandemic on the economies and the populations especially poor and vulnerable populations. India is no exception to this challenge that can jeopardize India's gains in reducing poverty, improving access to livelihoods and social protection for 1.3 billion people. There is therefore an acute pressure on the Government to accelerate economic recovery, creating a risk that economic imperatives may dilute environmental sustainability considerations.

UNDP has globally rolled out the COVID response strategy across nations and the next phase is designed to help decision-makers look beyond recovery, towards 2030, making choices and managing complexity and uncertainty in four main areas: governance, social protection, green economy, and digital disruption. It encompasses our role in technically leading the UN's socio-economic response. In this regard, UNDP India is initiating a Project titled "**Green Recovery Pathway for India – transitioning towards a green and resilient COVID-19 recovery".** This programme aims to address the critical need to advocate for an inclusive and environmentally sensitive response to COVID-19 that resets towards sustainable and inclusive pathways to recovery to build back better.

In addition to policy advocacy for a green recovery with Government and other key partners, the project will promote nature-based jobs and livelihoods, addressing linkages between nature and health through a one health approach, integrating climate commitments into urban planning, agriculture and land use solutions, and accelerating transition towards green energy as part of the

DocuSign Envelope ID: 5C0D9AF9-D072-4389-AFF7-2B572E436E1A

COVID response. This approach will have a special focus on reaching and empowering women and young people as well as marginalized communities such as disadvantaged tribes and castes. Through this approach, UNDP will support investing in rural jobs and livelihoods including by promoting public works in the areas of water conservation, horticulture and animal husbandry, increasing nature-based micro-entrepreneurship opportunities for rural women and vulnerable communities, advocating for one health approaches that address links between human and animal health, and supporting policy advocacy for green recovery and green financing.

At the national level, UNDP will work closely with various ministries to advocate for green recovery and financing. UNDP will also work closely with few selected State Governments to implement programme activities, while collaborating with community-based organizations and private sector partners respectively to ensure outreach to women and marginalized groups and expand access to job and livelihood opportunities and create markets linkages for micro-entrepreneurs.

Nadia Rasheed, Deputy Resident Representative, UNDP India

I. PURPOSE AND EXPECTED OUTPUT

1. PURPOSE

India continues to face an acute COVID-19 crisis with the 2nd highest number of confirmed cases globally, after the United States, and the 3rd highest number of deaths as of October 2020. The pandemic has unleashed an unprecedented health and development crisis that is threatening development gains and exacerbating social and economic inequalities. In response, the Government announced a USD 265 billion recovery package to address the impact of COVID-19. While this stimulus package provides critical support to strengthening the health response, expanding social protection and rebuilding the economy, the scale of the ongoing crisis requires significantly expanded efforts to protect lives and livelihoods while also ensuring a green and sustainable path to recovery.

The Indian economy witnessed its largest ever GDP contraction due to COVID-19, with a 24 percent drop between April and June 2020, and overall, the economy is forecast to contract by 6% in 2020. The unemployment rate rose from 7% before the start of the pandemic to more than 27% in May 2020 but has since rebounded. Data from the lockdown period indicated that women were more affected by job losses than men, with one study finding that four in 10 women had lost a job compared to three in 10 men. This finding is especially concerning given that India already has one of the lowest rates of female labour force participation in the world at less than 25%, as compared to 76% for men.

DocuSign Envelope ID: 5C0D9AF9-D072-4389-AFF7-2B572E436E1A

Nearly 60 percent of the population in India is directly dependent on climate-sensitive sectors such as agriculture, fisheries and forestry for its livelihood, and 80% of economically active women are employed in the agriculture sector. The impact of climate change has already increased vulnerability of communities that rely on these sectors, and in particular landless, small or marginal farmers, minority communities and vulnerable women. These communities are now facing immense additional burdens from the impacts of COVID, including increased illness, loss of livelihoods, increased burden of supporting returnee migrants who have lost urban jobs, and loss of remittances previously provided by migrant family members.

The continued COVID-19 crisis and economic downturn is expected to stall development progress and push millions of people into extreme poverty. There is therefore an acute pressure on the Government to accelerate economic recovery, creating a risk that economic imperatives may dilute environmental sustainability considerations. Given this context, an important priority for UNDP in India is to work with partners and key stakeholders to advocate for an environmentally sensitive response to COVID-19 that resets towards greener pathways for recovery. This focus will not only help to move towards a more sustainable, inclusive and resilient recovery, but can also help to strengthen recovery by focusing on emerging and innovative green job opportunities.

In addition to policy advocacy for a green recovery with Government and other key partners, this approach will include promoting nature-based jobs and livelihoods, addressing linkages between nature and health through a one health approach, integrating climate commitments into urban planning, agriculture and land use solutions, and accelerating transition towards green energy as part of the COVID response. This approach will have a special focus on reaching and empowering women and young people as well as marginalized communities such as disadvantaged tribes and castes.

Through this approach, UNDP will support investing in rural jobs and livelihoods including by promoting public works in the areas of water conservation, horticulture and animal husbandry, increasing nature-based micro-entrepreneurship opportunities for rural women and vulnerable communities, advocating for one health approaches that address links between human and animal health, and supporting policy advocacy for green recovery and green financing.

2. PROJECT OUTPUTS AND ACTIVITIES

This project is aimed at mitigating the social and economic impacts of COVID-19 and steering towards sustainable and inclusive pathways to recovery to build back better, with a focus on prioritizing vulnerable communities, women and young people. Through this project UNDP will strengthen advocacy, policies and capacities to advance green recovery, while also directly reaching 22,000 people to expand access to green jobs and livelihoods. Innovative approaches and digital platforms and solutions will be applied to support implementation of the project as well as promote experimentation and identification of solutions and best practices for scale-up.

The intended outcome is to advance green recovery by expanding access to green jobs and livelihoods, increasing use of green energy solutions and adoption of green infrastructure to enhance access to basic services, establishing collaborative platforms and building capacity to promote a one health approach, and strengthening policy advocacy to create momentum for green recovery and green financing.

The project will result in the following outputs:

- Increased access to green jobs and livelihoods;
- Adoption of clean energy solutions and green infrastructure;
- Application of “One Health” approach to strengthen prevention and management of zoonotic diseases; and

DocuSign Envelope ID: 5C0D9AF9-D072-4389-AFF7-2B572E436E1A

- Increased advocacy for adopting green recovery pathways and expanding green financing.

At the national level, UNDP will work closely with the Ministry of Environment, Forest and Climate Change and other key Government entities such as the Ministry of Finance and NITI Aayog (the central Government entity with responsibility for the SDGs) to advocate for green recovery and financing. UNDP will also work closely with State Governments in Mizoram, the National Capital Region, Sikkim and Uttarakhand to implement programme activities, while collaborating with community-based organizations and private sector partners respectively to ensure outreach to women and marginalized groups and expand access to job and livelihood opportunities and create markets linkages for micro-entrepreneurs.

Key activities to increase access to green jobs and livelihoods include identifying and promoting climate resilient public works to expand opportunities for rural green jobs and livelihoods, providing trainings and facilitating links to Government financing to enable uptake of green transport jobs and livelihoods and eco-entrepreneurship, and training small scale farmers, entrepreneurs and collectives on sustainable agricultural and organic practices.

To scale-up adoption of clean energy solutions and green infrastructure, UNDP will build capacities of women leaders and frontline functionaries to integrate adoption of clean energy solutions and green infrastructure in village plans and programmes, solarize primary healthcare centres to ensure uninterrupted access to critical health services, and promote use of clean energy solutions and facilitating access to Government subsidies for women entrepreneurs and women-led Self Help Groups.

To expand application of a “One Health” approach to strengthen prevention and management of zoonotic diseases, UNDP will build capacities of frontline government officials and local communities to address zoonotic diseases, conduct sensitization trainings and support enforcement of laws and community-based surveillance to reduce consumption of illegal and wild meat, conduct sensitization trainings to increase awareness of one health approaches at national and sub-national levels, and develop digital platforms and information systems for early warning on zoonotic diseases aimed at connecting key stakeholders at sub-national and national levels.

Increased advocacy for adopting green recovery pathways and expanding green financing, will be supported through developing and compiling policy briefs, tools and best practices to advocate for green recovery and green financing, and convening multi-stakeholder forums and policy dialogues to disseminate tools and advocate for green recovery and financing with national and State Governments.

UNDP, as the responsible body for the management of the contribution, will oversee all technical aspects of planning and implementing project activities, fostering quality assurance, managing operational activities including procurement, finance, and human resources, while ensuring that operations adhere to UNDP ethics and accountability policies, principles and standards while enabling fast implementation within the given timeline within the range where UNDP can manage.

The project will be implemented by UNDP as Implementing Agency in close cooperation with government, non-government partners and technical institutions. UNDP will be responsible for the effective use of resources and the achievement of project outcome and outputs as set forth in the document. UNDP will designate a nodal officer, who will be focal point for the project coordination and two associates for all financial management, reporting, procurement and recruitment services. The project will be implemented in the Direct Implementation Modality (DIM). Activities will be carried out within the specified timeframe and in a coordinated and harmonized manner.

3. PARTNERSHIPS

In the target States, UNDP is already working closely with related Departments and will leverage existing partnerships to further the project objectives in conjunction with these Departments. UNDP will be partnering with the Government Departments in the States of Uttarakhand, Sikkim, Mizoram and the National Capital Region, through supporting the implementation of the various activities under the project. The project will also build upon existing partnerships with a variety of other

DocuSign Envelope ID: 5C0D9AF9-D072-4389-AFF7-2B572E436E1A

stakeholders –Civil society organizations, Industry associations, private sector, social enterprises and technical institutes. UNDP is working closely with civil society organizations in responding to COVID-19, including in raising awareness, addressing stigma and gender-based violence, and expanding outreach of programmes to communities. UNDP will be partnering with grassroots NGOs in the implementation of green jobs, eco entrepreneurship, green transport, livelihood activities, climate resilient planning for public works and energizing health centres and mainstreaming One Health concerns. It will work closely with Sector Skill Councils for promoting green growth through e-mobility and livelihood promotion.

The project will build partnership with community-based organizations to work with Village Council's for creating climate resilient assets through the public works programme and providing wage employment to workers in rural areas. This particular initiative will work with the village councils to ensure increased women's participation in decision-making at the village council level to choose the types of works to be carried out in their own villages. Partnerships will be launched with Women Self Help Groups (WSHGs) in the reference area of the project. Engagement with WSHGs provides a great opportunity to strengthen women's economic empowerment and their ability to provide the required adaptive capacity to the community in times of distress and shocks.

It will also establish partnerships with the State Health Departments to network with selected Primary Health Centres (PHCs), and Community Health Centres (CHCs). In partnership with the State Renewable Energy Department, the project will provide renewable energy to PHCs that will improve their capacity to provide adequate healthcare - especially in emergency situations like the pandemic.

As One Health looks at the interconnectedness of human, animal and environmental health, UNDP will leverage these existing partnerships to further the One Health approach in select States by assessing the current status, identifying gaps and building necessary capacities to develop a robust One Health framework in the country.

II. MANAGEMENT ARRANGEMENTS

The resources received toward the above-mentioned outputs will be directly handled by UNDP India. The proposal will be implemented through the Direct Implementation Modality (DIM) by UNDP India, in accordance with UNDP financial rules and regulations for effective delivery of results. The whole Project will be managed from India Country Office with operational support from a designated nodal officer who will be focal point for the project coordination and two associates for all financial management, reporting, procurement and recruitment services. The proposal will be implemented in line with the UN/World Bank in India Programmatic Response to COVID, under the overall guidance of the RC and RR, and in collaboration UNCT, national and state Governments. A Coordination Committee of various technical partners will be formed and they will be kept posted of the progress of implementation of activities. The interventions to be supported by CBOs/CSOs/Other networks and the amount of funding to be provided will be tentatively detailed in a Memorandum of Understanding (MOU). UNDP will enter into contracts with individuals and agencies in line with its rules and procedures and keeping within the mandate of direct implementation of the above support. Activities will be carried out within the specified timeframe and in a coordinated and harmonious way. UNDP India is repurposing some of the ongoing programme activities in line with the COVID response framework.

Oversight, Monitoring and Evaluation

UNDP will undertake monitoring and reporting on project activities in accordance with its Programme and Operations Policies and Procedures (POPP) for Project Management. Final narrative report including an interim financial report will be prepared at the operational completion of the project. Final financial report will be prepared after financial closure of the project by following UNDP policy. UNDP will directly manage and implement the project components in accordance with partner agencies' financial rules and regulations. Project management will be overseen by a Project Steering Committee to ensure accountability for activities, results and use of resources, while at the same time fostering national ownership and linkages with national and sub-national priorities. Dedicated project management capacities will be assigned, with defined roles and responsibilities and with

DocuSign Envelope ID: 5C0D9AF9-D072-4389-AFF7-2B572E436E1A

oversight by UNDP and the responsible party. UNDP will leverage expertise and lessons learnt through respective regional bureaus and Country Offices to enrich project outcomes.

UNDP will deploy monitoring systems to track performance through collection of appropriate data; analyse evidence to inform management decision-making; and report on performance and lessons to facilitate learning. Data will be collected through remote monitoring where necessary, including through third-party monitoring agencies.

The project results framework will be monitored monthly with standard UNDP project quality assurance criteria to assess progress and achievement of results, in addition to updating risks to manage changes during the implementation period. An end of project results report will be prepared along with lessons learnt for sustainability and to inform future programming of UNDP.

Standards of Performance

UNDP will implement the project with all due diligence efficiency and economy in line with UNDP rules and procedures., UNDP will observe sound management practices in line with its programme policy and guidelines.

Project Audit

The audit would be conducted as per UNDP rules and regulations

Project Closure

The project would be closed as per UNDP rules and regulations.

III. MONITORING

Monitoring Activity	Purpose	Frequency	Expected Action	Partners (if joint)	Cost (if any)
Track results progress	The progress data against the results indicators in the work plan will be collected and analysed to assess the progress of the project in achieving the agreed outputs.	Monthly	Slower than expected progress will be addressed by project management.	State Government Departments, NGOs, CSOs and research Institutions, Industry associations.	NIL
Monitor and Manage Risk	The project will identify specific risks that may threaten achievement of intended and monitor risk management actions using a risk log. This will include monitoring measures and plans that may have been required as per UNDP's social and Environmental Standards. Audits	Quarterly	Risks are identified by project management and actions are taken to manage risks. The risk log is actively maintained to keep track of identified risks and actions taken.	State Government Departments, NGOs, CSOs and research Institutions, Industry associations.	NIL

DocuSign Envelope ID: 5C0D9AF9-D072-4389-AFF7-2B572E436E1A

	will be conducted in accordance with UNDP's audit policy to manage financial risk.				
Learn	The project will capture knowledge, good practices and lessons regularly, as well as actively source from other projects and partners and integrate back into the project.	Annually	Relevant lessons will be captured by the project team and used to inform management decisions.	State Government Departments, NGOs, CSOs and research Institutions, Industry associations.	NIL
Annual Project Quality Assurance	The quality of the project will be assessed against UNDP's quality standards to identify project strengths and weaknesses and to inform management decision making to improve the project.	Annually	Areas of strength and weakness will be reviewed by project management and used to inform decisions to improve project performance.	State Government Departments, NGOs, CSOs and research Institutions, Industry associations.	NIL
Review and Make Course Corrections	Internal review of data and evidence will be conducted from all monitoring actions to inform decision making.	Annually	Performance data, risks, lessons and quality will be discussed by the project board and used to make course corrections.	State Government Departments.	NIL
Project Report	A progress report will be prepared, consisting of progress data showing the results achieved against pre-defined annual targets at the output level, the annual project quality rating summary, an updated risk long with mitigation measures, and any evaluation or review reports prepared over the period.	Annually, and at the end of the project (final report)			NIL
Project Review	The project's governance mechanism (i.e.				USD 1500

DocuSign Envelope ID: 5C0D9AF9-D072-4389-AFF7-2B572E436E1A

(Project Board/PSC)	Project Steering Committee) will hold regular project reviews to assess the performance of the project and review the Multi-year work plan to ensure realistic budgeting over the life of the project. In the project's final year, the PSC will hold an end of project review to capture lessons learned and discuss opportunities for scaling up and to socialize project results and lessons learned with relevant audiences.				

DocuSign Envelope ID: 5C0D9AF9-D072-4389-AFF7-2B572E436E1A

IV. WORK PLAN

Period[1]:January 2021 to June 2022

The template followed is this. Pls complete this one.

EXPECTED OUTPUTS *And baseline, indicators including annual targets*	PLANNED ACTIVITIES *List activity results and associated actions*	TIMEFRAME						RESPONSIBLE PARTY	PLANNED BUDGET		
		Q1	Q2	Q3	Q4	Q5	Q6		Funding Source	Budget Description	Amount
Output 1 - Increased access to green jobs and livelihoods through trainings and partnership platforms with Government and the private sector Indicators/ Baseline/Target: 1.1 No of beneficiaries (including women) linked to climate resilient public works BASELINE- 0; TARGET - 31000 1.2 No of beneficiaries supported with linked to trainings/capacity building programmes on Green transport/ eco entrepreneurship and job linkages BASELINE- 0; TARGET - 2000 1.3 No of beneficiaries reached/benefitted through green jobs/ capacity building measures on green livelihoods and linkages with govt. support schemes BASELINE- 0; TARGET – 1000 individual (15 Collectives)	***1.1 Identify, promote and facilitate access to climate resilient public works to expand opportunities for rural green jobs and livelihoods (this activity is linked to 1.3 and 2.1)*** *1.1.1 Creating awareness for public work programme entitlements* *1.1.2 Linking women to green jobs through climate resilient public works*							RFF		35000
	1.2 Provide trainings to youth and women, facilitate links to Government financing and work with industries to enable uptake of green jobs and eco-entrepreneurship (60% women) *1.2.1 Identification and prioritisation of specific green jobs, skills set, eco entrepreneurship opportunity and govt promotion schemes (in green transport sector) with multiple stakeholders* *- Stakeholder diccussion on state level interventions on green jobs and greening recovery for selected states* *- Prepare a brief document to promote women participation in the EV sector*							UNDP, Technical Agency	RFF		27000
	1.2.2 Promotion of green jobs and eco-entreprenurship through associations, skill councils and existing platforms *- Initiate dialogues with ongoing platform in Delhi and support creation of a platform in Karnataka with the Skills department on EV mobility* *- Prepare background documents/policy briefs to support State level discussion and promote knowledge sharing*							UNDP, Industry Associations, Sector Skill Councils	RFF		

[1] Maximum 18 months

DocuSign Envelope ID: 5C0D9AF9-D072-4389-AFF7-2B572E436E1A

	1.2.3 Facilitate training for sustainable green jobs and create eco-entrepreneurs *- Identify the trainers and the training institutes on EV mobility* *- Mobilise women and girls to participation in training (atleast 60% women)* *- Build capacity of the State Skills department to ensure sustainability towards women participation in training programme and create opportunities for employment and entreprenuership*							UNDP, Technical Agency, CPPGG, State department	RFF		32000
	1.3 Train small scale farmers, entrepreneurs, and collectives on sustainable agricultural and organic practices to promote and expand green livelihood options (60% women) *1.3.1 Identify communities and collectives to promote and diversify sustainable agricultural practices* *- Promote sustainability in agricultural management by identifying natural resources, especially NTFPs and indigenous produce and practices* *- Engage with communities to create producer groups and collectives, which are organised and trained* *- Engage with local communities to identify and document sustainable agricultural practices which promote green livelihood opportunities*							UNDP, Technical Agency	RFF		13500
	1.3.2 Based on needs assessments create knowledge products and practical training tools for bridging skill gaps *- Mobilise farmers to engage in training (60% women)* *-Mobilise micro-entrepreneurs to engage in training for strengthening value chains (60% women)* *- Create knowledge documents and tools which can be updated and used as a resource for promoting green livelihoods*							UNDP, Technical Agency	RFF		11300
	1.3.3 Create community level awareness programmes on promotion of green livelihoods linked with economic and environmental impact *- Engage with all stakeholders in communities to create participation and enhance capacities to promote green economy (60% women and youth)* *- Create knowledge documents reflecting green agricultural solutions which are adaptable and relevant for local needs*							CBO, UNDP, Technical Agency	RFF		29800
	1.4 Develop best practice documents, policy briefs, tools and, strategies and convene policy dialogues and multi-stakeholder forums to advocate for green recovery and green financing (TBC)										2000

Output- 3 Application of 'One Health' approach to strengthen prevention and management of zoonotic diseases through trainings, partnership platforms and digital solutions 3.8 & 3.9 Indicator - increase in awareness of local communities regarding ITW and zoonotic diseases. Target - 50% Baseline - 0	***3.1 Conduct sensitization trainings and build capacities of frontline government officials and local communities to address zoonotic diseases and implement a one health approach at national/sub-national levels (50% women)*** *3.1.1 Development of modules/training material/SOPs on prevention of zoonotic diseases and One Health* *3.1.2. Review of existing information and sources to prepare a background document on status of zoonotic diseases and need for the One Health approach in the States.* *3.1.3. Identification of stakeholders, capacity gap assessment and development of capacity building framework for identified stakeholders.* *3.1.4. Review of exisitng curriculum/modules under various universities and training centres* *3.1.5. Development of concept/IEC/training material on One Health* *3.1.6. Formation of an advisory group under the National Biodiversity Authority (includes sitting fee)*							Technical agency, NBA, Forest Dept., Animal Husbandry Dept, UNDP.	RFF		6500
3.4 Indicator - frontline staff and officers trained on One Health Target - 300 Baseline - 0 3.5 Indicator - community members trained as Para-vets. Target - 100 Baseline - 0	***3.2. Identification of at risk species and vulnerable areas of zoonotic diseases*** *3.2.1. Baseline surveys to identify critical areas , vulnerable species and transmission pathways for zoonotic diseases in target landscape.* *3.2.2. Listing of zoonotic diseases in the landscapes in last one or two decades with focus on high altitude Himalayan region.* *3.2.3. Prioritization of Zoonotic Diseases*							Experts, UNDP Team, Animal Husbandry Dept., Veterinarians, Forest Department.	RFF		3000
3.11 Indicator - Digital Solution/Platforms Piloted Target - 02 Baseline - 0	***3.3. Meetings and Discussions on One Health at the State and Landscape Level.*** *(i) Project Inception workshops to discuss implementation of "One Health approach" with key stakeholders at Landscape level.* *(ii) Followed by cluster level meeting in pilot villages (4-5 meetings)*							UNDP Team, Animal Husbandry, Public Health and Forest Dept, District Administration.	RFF		2800

DocuSign Envelope ID: 5C0D9AF9-D072-4389-AFF7-2B572E436E1A

	3.4. Trainings on 'One Health' approach & management of zoonotic diseases for frontline staff and officers from Forest Dept, Animal Husbandry Dept & Public Health Dept. *(prevention and control of key zoonotic diseases. (2 trainings in each state)*							Expert Agency, UNDP Team, Animal husbandry, Veterinarians, Forest Department, Public Health Dept., District Administration.	RFF		20090
	3.5 'One Health' Para-veterinarian training programmes for community members especially women and CBO's. *(2 trainings)*							Expert Agency, UNDP, CBO's.	RFF		15000
	3.6 Provision of field detection and sample collection kits to frontline staff and Para -veterinarians.							UNDP team, Animal Husbandry Dept, Forest Dept, CBO's.	RFF		15000
	3.7 Supporting Forest Dept. & Animal Husbandry Dept. in augmenting livestock immunization in and around Protected Areas.							Forest Department, Animal Husbandry Dept., UNDP Team.	RFF		10000
	3.8 Conduct trainings and awareness raising for local communities and support community-based surveillance and enforcement of laws to reduce consumption of illegal/wild meat and reduce risks of zoonotic diseases *3.8.1. Conduct community level awareness programmes:- (4 nos.) (i) Engage Para vets in surveillance of zoonotic diseases in target village (ii) Puppet shows for school children (iii) Community radio programmes*							Communications Agency, Radio-fellows, UNDP team, Animal Husbandry Dept., Forest Dept., Public Health Dept.	RFF		10000
	3.8.2 Development and dissemination of knowledge products on One Health and prevention of Illegal wild meat consumption.							Expert Agency, WCCB, UNDP, CBO's.	RFF		5000
	3.8.3 Establishment of One Health Section in the Primary Health Centre (Repository of literature and knowledge products, important contact nos. etc). (Also includes support for solarisation of the PHC) to climate							UNDP team & Public Health Department.	RFF		5000

	3.8.4. Demonstration of Sentinel Surveillance Site/Biodiversity Resource Centre (01 nos) *(I). Site Identification & Development of concept note on sentinel site.* *(II). Development of the site.*							UNDP team, Wildlife Division and Animal Husbandry Department.	RFF (Additional Budget if any through GEF)		7000
	3.9 Develop 'one health' digital platforms for early warning on zoonotic diseases and to connect key stakeholders at sub-national and national levels *3.9.1 Creating an early warning system and MIS focusing on detection and management of zoonotic diseases.*							Expert Agency, UNDP team, Forest Department, Animal Husbandry Dept., Public Health Dept.	RFF		27796
	Other Management cost/DPC/Travel										22814
Output 4 - Increased advocacy for adopting green recovery pathways and expanding green financing through dialogues, meetings, knowledge products and briefs to support	*4.1.1 Develop evidence, best practice documents green recovery and green financing*							Research agencies, Government Departments	RFF		20000
	4.1.2. Organising Policy Dialogues and Multi Stakeholder Forums on Green Recovery & Green Financing							Research agencies, Government Departments	RFF		9016
Indicator- Policy Document, best practices document, guidance notes, dialogues with stakeholders Target - 4 Baseline - 0	*4.1.3 Commissioning a research on role of Green Economy for long term recovery from COVID-19 and achievement of targets set under SDGs.*							Technical Research agencies, Government Departments	RFF		14000
