Project Title	Leveraging Nationally Determined Contributions (NDCs) to achieve net-zero emissions and climate-resilient development, in response to the climate emergency (JSB 2021 NZE project)
Project Number (Award ID)	00127730 00137119
Project Number (Atlas Output ID)	
Implementation Modality	DIM
Implementing Partner	UNDP
Start Date	22 March 2022
End Date	21 March 2023
LPAC Meeting date	No LPAC required as it is Project Initiation Plan (PIP)

Vision Statement for the strategic area / CPD Pillar

Communities and ecosystems are resilient to climate and disaster risk, follow sustainable and equitable consumption practices, have equitable access to clean energy and natural resources contributing to reduced marginalization, poverty and inequality.

Overall results description for 2022

To ensure a just trasnision and inclusive, green recovery, the project will aim to identify climate mitigation and adaptation interventions with the capacity to scale and meaningfully contribute to India's Net Zero Emissions by 2070.

To achieve this goal, the Initiation plan has two outputs: 1) Low-carbon development contributing to “just transition” and creating green jobs in transport (urban mobility), MSME, health and agriculture sectors; 2) Enhancing resilience of communities through community-based adaptation and livelihood diversification.

The result from this Initiation plan will contribute to India's Nationally Determined Contribution (NDC) of Paris Agreement (mitigation and adaptation). Specifically, the Initiation Plan contributes to below NDC target.

- Reduce the emissions intensity of its GDP by 45 percent by 2030 from 2005 level.
- 50% cumulative electric power installed capacity from non-fossil fuel-based energy resources by 2030.
- Better adapt to climate change by enhancing investments in development programmes in sectors vulnerable to climate change.
- To build capacities for quick diffusion of cutting-edge climate technology.

Contributing Outcome (UNSDF / CPD) and Indicator (s) *(refer signed multi-year prodoc)*

UNSDF outcome 6. By 2022, environmental and natural resource management is strengthened and communities have increased access to clean energy and are more resilient to climate change and
disaster risks.

CPD Output(s) and Indicator (s) *(refer signed multi-year prodoc)*

CPD Output 3.1: Effective institutional, legislative and policy frameworks in place to enhance the implementation of climate change and disaster risk reduction at national and subnational levels.
Indicator 3.1.1: Number of national, state and sectoral disaster risk reduction and climate change strategy/action plans that also address gender considerations implemented.
Baseline: 2 Target: 10

CPD Output 3.3. Inclusive and sustainable solutions adopted to achieve increased energy efficiency and universal clean energy access.
Indicator 3.3.1: Underserved, poor communities and women benefiting from new partnerships with funding for sustainable energy solutions.
Baseline: 0.1 million (2018); Target: 1.03 million
Indicator 3.3.2: Number of sectors upscale energy efficiency, and/or renewable energy coverage.
Baseline: 5; Target: 10

GLOBAL PILLAR ONE: Clean energy and net-zero pathways - 1.1 Driving investment in clean energy sectors and infrastructure to support India's Nationally Determined Contribution (NDC) **COUNTRY OUTPUT 1:** Low-carbon development contributing to "just transition" and creating green jobs in transport (urban mobility), MSME, health and agriculture sector. **Indicator 1:** Low-carbon technologies identified, standards developed based on marginal abatement cost in urban mobility, health, and agriculture sectors. Baseline: 0 Targets: 3 **Indicator 2:** Number of low carbon technology systems and strategies deployed in 4 sectors. Baseline: 0 Targets: 365 Indicator 3: Number of youths trained to support scaling commerical operations of green technologies Baseline: 0 Targets: 1000 **GEN 2 :** At least 50% of all direct beneficiaries will be women and girls in activities where clean and efficient energy systems are distributed. Women/ women SHGs/ women-led enterprises will be prioritized/championed for ownership of the systems in project activities related to textile MSMEs in UP, EV charging stations in 4 cities, and cold storage systems in MP and Bihar. Equal, if not more women, will also be trained in entrepreneurial and corporate operations of these clean energy systems. In solarizing health facilities, efforts will be made to strengthen all health services, including women-centric interventions for pre and post-natal care among others.	**Activity 1.1 Result: For 3 sectors (urban mobility, health, and agriculture), low carbon technologies identified, standards developed, and deployment strategy finalized.**									JSB	UNDP, 1981	None
